DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statements filed on 3/26/2004 and 8/8/2005 have been considered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Beaton et al. (US 6,608,637 hereafter, Beaton).

Regarding claim 1, Beaton teaches a multitasking graphical user interface for a wireless cellular telecommunications device (Col. 2 lines 1-23) that includes a detection means for detecting an even and generating event data representing the event (Col. 6 lines 44-56), suspension means for suspending operation of an application program when an event is detected by the detection means (Col. 6 lines 1-7), storage means for storing event data generated by the detection means (Fig. 3 [3400 & 3440] and Fig. 4 [3440]), resume means for resuming operation of the application program suspended by

Art Unit: 2617

the suspension means (Col. 6 lines 1-7), and a delivery means for delivering the event data stored by the storage means to the application program resumed. (Col. 5 lines 36-54 and Col. 6 lines 1-56)

Regarding claim 2, Beaton teaches a storage means stores a set of event data each representing an events between the time period from the time of suspending operation of the application program by the suspension means to the time of resuming operation of the application program by the resume means. (Fig. 3 [3400], Fig. 4 [3440], Fig. 6 [start, stop, suspend, resume, save, initialize], Col. 5 lines 36-54 and Col. 6 lines 1-56)

Regarding claim 3, Beaton teaches a means with communicating via a communication network (Fig. 1 [1800]), wherein the suspension means suspends operation of the application program, when the communicating means receives a message designating the user carrying the terminal device. (Col. 5 lines 36-54 and Col. 6 lines 1-56)

Regarding claim 4, the limitations of claim 4 are rejected as being the same reason set forth above in claim 1.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- US 2003/0119562 to Kokubo regarding a task display switching method with the ability to suspend and resume tasks in a portable communication apparatus.

Art Unit: 2617

- US 2003/0045245 to Hikishima regarding a collapsible mobile terminal with two displays and an operational plan for suspending/resuming the use of the displays.
